The Department of Clinical and Health Psychology invites applications for a tenure-track position at the Assistant Professor rank. We are seeking a behavioral neuroscience pain researcher with current research funding to sustain and advance our active program in pain research in the department. The successful candidate will join the Health Psychology Area within the department.

For this position with the College of Public Health and Health Professions, the ideal candidate is expected to be an emerging leader capable of developing a nationally or internationally recognized, externally-funded research program in an area of specialization related to the behavioral neuroscience of pain and pain management. The successful candidate would be comfortable within a Scientist-Practitioner or Research Scientist culture and have active interest and skills in program development and collaborative research in a dynamic environment that includes both Health Professions and Public Health disciplines. Duties include a negotiable combination of research, research mentoring, and teaching. This position requires an individual to have excellent communication skills. Applicants must have a doctoral degree in a relevant field (Psychology, Neuroscience). Interested applicants should have completed their Ph.D. or post-doctoral training in a related field with an emphasis on pain.

The Department of Clinical and Health Psychology ([http://chp.phhp.ufl.edu/](http://chp.phhp.ufl.edu/)) is a unique, freestanding academic clinical psychology program with 25 core faculty, over 80 doctoral students, and two APA accredited programs: a doctoral program in clinical psychology and a clinical internship in professional psychology. The Department has a 50-year history of providing APA-accredited doctoral and internship training in clinical psychology and advanced specialty-specific training in four content areas: Child/Pediatric Psychology; Health Psychology; Neuropsychology, Neurorehabilitation and Clinical Neuroscience; and Cognitive Aging and Memory. The doctoral program has been ranked in the 93rd percentile by the National Research Council’s data-based ranking system.

UF is a comprehensive Research I institution that includes a wide range of academic departments and programs ([www.ufl.edu](http://www.ufl.edu)). The College of Public Health and Health Professions ([www.phhp.ufl.edu](http://www.phhp.ufl.edu)) is part of the University’s Health Science Center. The UF Health Science Center ([https://ufhealth.org/about-us](https://ufhealth.org/about-us)) is the country’s only academic health center with six health-related colleges located on a single, contiguous campus. They include the colleges of Dentistry, Medicine, Nursing, Pharmacy, Public Health and Health Professions, and Veterinary Medicine. The Health Science Center generates more than half of UF’s total research awards. The UF Health Science Center is closely affiliated with UF Health, part of the University of Florida Health System. Within the healthcare system are an 850 bed teaching hospital, an 81-bed psychiatric hospital, a 40 bed outpatient rehabilitation facility, and numerous outpatient and specialty clinics including a Psychology Clinic run by the Department of Clinical and Health Psychology.

UF is an equal opportunity institution dedicated to building a broadly diverse and inclusive faculty and staff. Hiring is contingent upon eligibility to work in the US. Searches are conducted in accordance with Florida’s Sunshine Law.
