Research Assistant Professor
Department of Clinical and Health Psychology

The Department of Clinical and Health Psychology within the College of Public Health and Health Professions invites applications for a Research Assistant Professor position in the area of clinical health psychology with an emphasis in perioperative cognitive research, surgical disparities, digital technologies in neuropsychology, and Alzheimer’s disease risk profiles relative to gastroenterological procedures. Applicants must have a doctoral degree in Clinical Psychology, or a related field and be licensed or license-eligible in the state of Florida to provide clinical service. The ideal candidate for this position is expected to: (a) display a strong career record of scientific and scholarly achievements relative to other professionals at their current professional rank; (b) have active interest and skills in building a collaborative research program within a dynamic, interprofessional, academic health center environment. This position is expected to focus primarily on research, with approximately one day per week spent delivering billable clinical services. The candidate will work closely with colleagues within the department, physicians, and other health care providers in a dynamic healthcare environment. This is a full- time (1.0 FTE), 12-month position, with an open start date.

The Department of Clinical and Health Psychology (http://chp.phhp.ufl.edu) is a unique, freestanding academic clinical psychology program with 31 core faculty, over 80 doctoral students, and two APA accredited programs: a doctoral program in clinical psychology and a clinical internship in professional psychology. We also have a post-doctoral fellowship that is soon to apply for APA accreditation, which includes 2 Health Psychology slots. The Department has a 50-year history of providing APA-accredited doctoral and internship training in clinical psychology and advanced specialty-specific training in four content areas: Child/Pediatric Psychology; Health Psychology; Neuropsychology, Neurorehabilitation and Clinical Neuroscience; and Cognitive Aging and Memory. The doctoral program has been ranked in the 93rd percentile by the National Research Council’s database ranking system.

UF is ranked as a top ten U.S. public university and is a comprehensive Research I institution that includes a wide range of academic departments and programs (www.ufl.edu). The College of Public Health and Health Professions (www.phhp.ufl.edu) is part of the University’s Health Science Center. The UF Health Science Center (https://ufhealth.org/about-us) is the country’s only academic health center with six health-related colleges located on a single, contiguous campus. They include the colleges of Dentistry, Medicine, Nursing, Pharmacy, Public Health and Health Professions, and Veterinary Medicine. The Health Science Center generates more than half of UF’s total research awards. The UF Health Science Center is closely affiliated with UF Health, part of the University of Florida Health System. Within the healthcare system are an 850 bed teaching hospital, an 81 bed psychiatric hospital, a 40 bed outpatient rehabilitation facility, and numerous outpatient and specialty clinics including a Psychology Clinic run by the Department of Clinical and Health Psychology.
